

Annex	Description (Please follow the detailed instructions on each page)
A	Rich List & Reserve Addresses
B	Swaps (1:1 and X:1 aka redenominations)
C	Supply Update
F	Fiat On/Off Ramps
G	Category pages
H	Tokenized Assets
I	Wallets
J	Proof of Reserves Wallets - To be completed by Exchanges only
K	Proof of Liabilities - To be completed by Exchanges only
L	Backfill Chart data
M	Token Unlock Schedule (POPULATE THE YELLOW CELLS ONLY)
Z	Leads Tracker
PoR Chains	Supported chains for PoR
A - Sample	Completed sample of Annex A (For illustrative purposes)
B - Sample	Completed sample of Annex B (For illustrative purposes)
C - Sample	Completed sample of Annex C (For illustrative purposes)
F - Sample	Completed sample of Annex F (For illustrative purposes)
G - Sample	Completed sample of Annex G (For illustrative purposes)

Instruction

1. Select 'File' > 'Make a Copy' to prepare your submission using Google Sheets. For a completed sample, please see [A-Example](#).
2. Insert as many rows as required for (TOTAL A & B ROWS) (1 row per address). Highlight the reserve wallet addresses in red. $Circulating\ Supply = Total\ Supply - Balances\ from\ reserve\ wallets$
3. Input data into the yellow cells.
4. Please adhere to the format and use the pre-filled values from the drop down menus.
5. Please submit your responses with the proper formatting by sharing the Google Sheets URL, and granting public access to the sheet. [File > Share > Anyone on the internet with this link can view](#)
6. Be truthful. False or misleading claims may render your submission inadmissible. Supply verification is subject to our [methodology](#).
7. Submit the completed sheet to [Link 1](#) or [Link 2](#). [Download our checklist and review supply page](#)

Annex A - Rich List & Reserve Addresses

If the asset is on multiple chains, please aggregate the addresses across all chains and color code them

SN	Address	Quantity	Percentage	Wallet Owner	Locked or Unlocked	Allocation	Future use/distribution	Date of Future distribution	Proof
1	Circulating Supply = # of coins that are circulating in the market and in the general public's hands.	Insert exact # of units	NA	NA	NA	NA	NA	NA	
2	Total Supply = # of coins in existence right now (minus any coins that have been verifiably burned).	Insert exact # of units	NA	NA	NA	NA	NA	NA	
3	Max Supply = maximum # of coins that will exist in the forthcoming lifespan of the cryptocurrency (minus any coins that have been verifiably burned).	Insert exact # of units	NA	NA	NA	NA	NA	NA	
4	API endpoint for Total Supply Numerical value only and denominated in the same units to calculate the price (JSON) Example: https://api.coinmarketcap.com/v2/bitcoin/	Insert API Endpoint URL	NA	NA	NA	NA	NA	NA	
5	API endpoint for Circulating Supply Numerical value only and denominated in the same units to calculate the price (JSON) Example: https://api.coinmarketcap.com/v2/bitcoin/	Insert API Endpoint URL							
6	Explorer Link - Insert URL	Insert Explorer URL	NA	NA	NA	NA	NA	NA	Insert URL or explanation
7	Richlist link - Insert URL	Insert Explorer URL	NA	NA	NA	NA	NA	NA	Insert URL or explanation
A	Insert Top 20 Supermarket addresses from the rich list Insert 1 row coin per address	Insert exact # of units	% of total supply						DDMMYYYY
B	Insert ALL hyperlinked addresses that fall under the following classification and (B) listed them appropriately Insert 1 row coin per address. Highlight the reserve wallet addresses in red. $Circulating\ Supply = Total\ Supply - Balances\ from\ reserve\ wallets$ Do not insert duplicate addresses	Insert exact # of units	% of total supply						DDMMYYYY
	Team/developer controlled assets - Privately allocated assets (This includes both locked and unlocked) - Assets allocated for future use/distribution (e.g. marketing, development purposes, bounty programs etc)								
1	Example of the correct format:	Insert exact # of units	% of total supply	Treasury	Locked	Private Sale	Liquidity provisioning	1 Apr 2009	
2	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
3	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
4	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
5	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
6	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
7	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
8	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
9	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
10	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
11	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
12	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
13	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
14	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
15	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
16	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
17	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
18	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
19	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
20	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
21	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
22	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
23	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
24	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
25	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
26	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
27	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
28	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
29	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							
30	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert exact # of units							

Instruction

- 1 - Select 'File > Make a Copy' to prepare your submission using Google Sheets. For a completed sample, please see [B-Sample](#).
- 2 - Insert as many rows as required for ITEM 16 ONLY (1 **new** row per address). Highlight the reserve wallet addresses in **red**. **Circulating Supply = Total Supply - Balances from reserve wallets**
- 3 - Input data into the **yellow** cells.
- 4 - Please adhere to the format and use the **predefined values** from the **drop down menus**.
- 5 - Please submit your responses with the proper formatting by sharing the Google Sheets URL and granting public access to the sheet. **File > Share > Anyone on the internet with this link can view**
- 6 - Be truthful. False or misleading claims may render your submission inadmissible. Supply verification is subject to our [methodology](#).
- 7 - Submit the completed sheet to [Form 5 - \[Existing Cryptoasset\] Coin/Token Swap](#)

Annex B - Swap form

If the asset is on multiple chains, please aggregate the addresses across all chains and color code them

S/N	Swap Details	Response	Exchange Swap End Date	Proof
1	(Old) Circulating Supply = # of coins that are circulating in the market and in the general public's hands.	Insert exact # of units	NA	Insert URL or explanation
2	(Old) Total Supply = # of coins in existence right now (minus any coins that have been verifiably burned).	Insert exact # of units	NA	Insert URL or explanation
3	(Old) Max Supply = maximum # of coins that will exist in the forthcoming lifespan of the cryptocurrency (minus any coins that have been verifiably burned).	Insert exact # of units	NA	Insert URL or explanation
4	(New) Circulating Supply = # of coins that are circulating in the market and in the general public's hands.	Insert exact # of units	NA	Insert URL or explanation
5	(New) Total Supply = # of coins in existence right now (minus any coins that have been verifiably burned).	Insert exact # of units	NA	Insert URL or explanation
6	(New) Max Supply = maximum # of coins that will exist in the forthcoming lifespan of the cryptocurrency (minus any coins that have been verifiably burned).	Insert exact # of units	NA	Insert URL or explanation
7	Will the new asset replace the original one? Or will both continue to co-exist side by side?	Insert Replace/Coexist	NA	Insert URL or explanation
8	Swap/fork ratio. (e.g. 1:1 exchange)	Insert Swap ratio	NA	NA
9	Platform that the old chain was on (e.g. Ethereum, NEO, EOS, Stellar)	Insert Platform name	NA	NA
10	Platform that the new chain is on (e.g. Ethereum, NEO, EOS, Stellar)	Insert Platform name	NA	NA
11	Date of conclusion of swap/fork (DD/MM/YYYY).	Insert DD/MM/YYYY	NA	Insert URL or explanation
12	API endpoint for Total Supply - Numerical value only and denominated in the same units to calculate the price (JSON) - Example: http://chainz.cryptoid.info/grs/api.dws?q=totalcoins	Insert API Endpoint URL	NA	NA
13	API endpoint for Circulating Supply - Numerical value only and denominated in the same units to calculate the price (JSON) - Example: https://sub.id/api/v1/chains/subsocial/supply/circulating	Insert API Endpoint URL	NA	NA
14	(New) Explorer URL	Insert Explorer URL	NA	NA
15	(New) Richlist URL	Insert Explorer URL	NA	Insert URL or explanation
16	(i) List of supported exchanges URLs (link directly to the specific market/pair) (ii) Start date of trading for new assets	Insert Exchange URL Insert 1 new row per exchange	DD/MM/YYYY	NA
S/N	Address	Quantity	Percentage	Wallet Owner
17	Insert ALL hyperlinked addresses that fall under the following classification and (ii) label them appropriately Insert 1 new row per address. Highlight the reserve wallet addresses in red . (Circulating Supply = Total Supply - Balances from reserve wallets) Do not insert duplicate addresses -Team/developer controlled assets - Privately allocated assets (This includes both locked and unlocked) - Assets allocated for future use/distribution (e.g. marketing, development purposes, bounty programs etc)	Insert exact # of units	% of total supply	
1	Example of the correct format: https://explorer.bloxroute.com/address/0x00	Insert exact # of units	% of total supply	Treasury
2	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
3	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
4	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
5	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
6	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
7	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
8	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
9	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
10	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
11	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
12	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
13	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
14	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
15	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
16	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
17	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
18	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
19	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
20	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
21	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
22	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
23	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
24	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
25	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
26	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
27	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
28	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
29	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	
30	Insert hyperlinked address (On solscan, this is called 'Token Account')	Insert exact # of units	% of total supply	

Instruction

- 1- Select **This > Make a Copy** to prepare your submission using Google Sheets. For a completed sample, please see [Sample](#).
2- Insert as many rows as required for (Old) or (New) row per address. Highlight the reserve wallet addresses in red. **Circulating Supply = Total Supply - Reserves from reserve wallets**
3- Input data into the yellow cells.
4- Please adhere to the format and use the predefined values from the drop down menus.
5- Please submit your responses with the proper formatting by sharing the Google Sheets URL and granting public access to the sheet. **File > Share > Anyone on the internet with this link can view**
6- Be truthful. False or misleading claims may render your submission inadmissible. Supply verification is subject to our [auditors](#).
7- Submit the completed sheet to [Table 1: Blockchain Development Checklist, verified supply sheet](#).

Annex C - Supply Update

If the asset is on multiple chains, please aggregate the addresses across all chains and color code them

SN	Address	Quantity	Percentage	Wallet Owner	Locked or Unlocked	Allocation	Future use/distribution	Date of Future distribution	Proof
1	(Old) Circulating Supply = # of coins that are circulating in the market and in the general public's hands	Insert asset # of units	NA	NA	NA	NA	NA	NA	Insert URL or explanation
2	(Old) Total Supply = # of coins in existence right now (minus any coins that have been verifiably burned)	Insert asset # of units	NA	NA	NA	NA	NA	NA	Insert URL or explanation
3	(Old) Max Supply = maximum # of coins that will exist in the forthcoming lifespan of the cryptocurrency (minus any coins that have been verifiably burned)	Insert asset # of units	NA	NA	NA	NA	NA	NA	Insert URL or explanation
4	(New) Circulating Supply = # of coins that are circulating in the market and in the general public's hands	Insert asset # of units	NA	NA	NA	NA	NA	NA	Insert URL or explanation
5	(New) Total Supply = # of coins in existence right now (minus any coins that have been verifiably burned)	Insert asset # of units	NA	NA	NA	NA	NA	NA	Insert URL or explanation
6	(New) Max Supply = maximum # of coins that will exist in the forthcoming lifespan of the cryptocurrency (minus any coins that have been verifiably burned)	Insert asset # of units	NA	NA	NA	NA	NA	NA	Insert URL or explanation
7	API endpoint for Total Supply - Numerical value only and denominated in the same units to calculate the price (JSON) - Example: https://api.coingecko.com/api/v3/simple/price?ids=bitcoin&vs_currency=usd&localization=full	Insert API Endpoint URL	NA	NA	NA	NA	NA	NA	Insert URL or explanation
8	API endpoint for Circulating Supply - Numerical value only and denominated in the same units to calculate the price (JSON) - Example: https://api.coingecko.com/api/v3/simple/price?ids=bitcoin&vs_currency=usd&localization=full	Insert API Endpoint URL	NA	NA	NA	NA	NA	NA	Insert URL or explanation
9	(New) Explorer URL	Insert Explorer URL	NA	NA	NA	NA	NA	NA	Insert URL or explanation
10	(New) Ricardian URL	Insert Explorer URL	NA	NA	NA	NA	NA	NA	Insert URL or explanation
11	Insert ALL hyperlinked addresses that fall under the following classification and (2) label them appropriately. Insert 1 asset per address. Highlight the reserve wallet addresses in red. (Circulating Supply = Total Supply - Reserves from reserve wallets) (Do not insert duplicate addresses) -Team/developer controlled assets -Privately allocated assets (This includes both locked and unlocked) -Assets allocated for future use/distribution (e.g., marketing, development purposes, bounty programs etc)	Insert asset # of units	% of total supply					COMMUNITY	Insert URL or explanation
1	Example of the correct format	Insert asset # of units	% of total supply	Treasury	Locked	Private Sale	Liquidity provisioning	1 Apr 2020	
2	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
3	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
4	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
5	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
6	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
7	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
8	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
9	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
10	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
11	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
12	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
13	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
14	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
15	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
16	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
17	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
18	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
19	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
20	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
21	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
22	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
23	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
24	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
25	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
26	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
27	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
28	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
29	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						
30	Insert hyperlinked address (On solscan, this is called "Token Account")	Insert asset # of units	% of total supply						

[illegible]

[illegible]

[illegible]

1. Select **File** > **Make a Copy** to prepare your submission using Google Sheets. Review the [Submission Instructions](#) to understand how to fill the fields.
2. Upload your **GOALS** to the **GOALS** sheet. Select the correct measurement from the dropdown menu. **GOALS** are the primary metrics that you will be tracking. Only insert new rows when you run out of them, **WHILE ADHERING TO THE GIVEN FORMAT BELOW**.
3. Please insert **GOALS** in the format below (using formulae only) and add to new rows and **DO NOT** delete rows.
4. Please submit your responses with the proper formatting by altering the Google Sheets URL, and granting public access to the sheet. The **How to Register an Interview with this link** can view the tutorial.
5. Please insert **GOALS** in the format below (using formulae only) and add to new rows and **DO NOT** delete rows.
6. Submit the completed sheet to [Goals](#) > [Google Sheets](#) > [Submit your submission](#).

[illegible]

Instruction

- 1 - Select 'File > Make a Copy' to prepare your submission using Google Sheets. See completed sample [here](#).
2 - Input data into the yellow cells.
3 - Please adhere to the format. Do NOT reorder/renumber the rows, or modify the template in any way.
5 - Please submit your responses with the proper formatting by sharing the Google Sheets URL and granting public access to the sheet. File > Share > Anyone on the internet with this link can view
6 - Be truthful. False or misleading claims may render your submission inadmissible.
7 - Submit the completed sheet to [Form 7 - \(Existing Cryptoasset\) Update info \(e.g. Rebrand, URL update\)](#)

Instruction

1 - Select 'File > Make a Copy' to prepare your submission using Google Sheets.

2 - Input data into the yellow cells. Please refer to orange cells and adhere to the formatting.

3 - Please adhere to the format. Do **NOT** reorder/renumber the rows, or modify the template in any way.

5 - Please submit your responses with the proper formatting by sharing the Google Sheets URL and granting public access to the sheet. File > Share > Anyone on the internet with this link can view

6 - Be truthful. False or misleading claims may render your submission inadmissible.

7 - Submit the completed sheet to Form 6 - Listing Exchange/ Update info (e.g. Rebrand, API update)

Annex J - Proof of Reserves Wallets - To be completed by Exchanges only

Only wallet addresses with a balance >\$500,000 for selected assets on supported chains will be displayed

See supported chains

Instruction

1 - Select 'File > Make a Copy' to prepare your submission using Google Sheets.

2 - Input data into the [yellow](#) cells. [Please refer to orange cells and adhere to the formatting.](#)

3 - Please adhere to the format. Do **NOT** reorder/renumber the rows, or modify the template in any way.

5 - Please submit your responses with the proper formatting by sharing the Google Sheets URL and granting public access to the sheet. [File > Share > Anyone on the internet with this link can view](#)

6 - Be truthful. False or misleading claims may render your submission inadmissible.

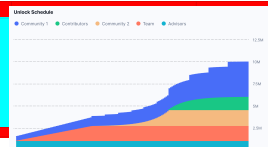

7 - Submit the completed sheet to [Form 7 - \[Existing Cryptoasset\] Update info \(e.g. Rebrand, URL update\)](#)

7a - Please check the exchange's 5-min line chart in the first few hours since listing before raising any requests. Note that CMC's line charts take the 5-min closing price (as is customary with ohlcv data). As a data aggregator, CMC will NOT delete data to help projects improve chart optics. If the trade did indeed transpire, it will be displayed on the price chart. If there are legitimate reasons to modify chart data, projects may complete ANNEX L below. A fee may be levied depending on the complexity of the task.

Annex L - Backfill Chart data

[illegible]

- 1- Select 'File' > Make a copy to prepare your submission using Google Sheets.
- 2- Please adhere to the format. Do not renumber/unnumber the rows, or modify the template in any way. You may insert additional rows (one row per entry) as long as the format is not altered.
- 3- Be truthful. Fake or misleading claims may render your submission invalid.
- 4- The orange cells contain **completed** examples for reference, with the **previous chart** located in the top right corner.
- 5- Login to **self-reporting dashboard (SRD)** and use the Bulk Upload function.
- 6- Be truthful. Do not **delete** data from Rows 6-13 before inputting data into the **yellow cells**.
- 7- Go to **Index.M2** tab (everything is **auto-updated**) > Delete all empty/unfilled rows (**do not edit anything else**) > Download the file in **CSV format** > Upload the CSV file via the SRD
- 7- If #6 does not work, input manually in **R5D10**
- 8- The **yellow cells** provide the **data** you wish to **appear**, and on the corresponding **yellow** cells, Unlocked Supply (UCS) is **not the same** as circulating supply (CS).
- 9- **Tags** on how to **release Unlocked %**: (i) Add data for **summarize allocations to account for future emissions** or (ii) Deduct burnt tokens
- 10- **Unlocked tokens** = **Max (MS, TS)** (locked + unlocked at the terminal point on the **Unlocks** chart).

[SAMPLE] S/N	Allocation name	startDate	endDate	vestingType	vestingEvery	vestingFrequency	rate	tokenAmount
--------------	-----------------	-----------	---------	-------------	--------------	------------------	------	-------------

Ensure that each allocation name is unique For more details on the unique allocation names, ensure that the allocation name is unique by replacing a number of the Bank ID, Name 1, Name 2		Start date of allocation. Must be in YYYY-MM-DD hh:mm:ss format	End date of allocation. Must be in YYYY-MM-DD hh:mm:ss format Note: Tokens will not be unlocked at auction. Check if there is an overhang period for the same allocation.	1. CDF : single event where tokens are released. It's the same as TGE except that it happens after some tokens are released already. If "CDF" is selected as the vesting type, ensure that the "inflationary/deflationary" and "vesting/frequency" fields for that row are blank. If blank, tokens will be unlocked on TGE, select "CDF" as the vesting type. 2. Linear : when the same amount of tokens is released with a certain frequency until a certain date. Linear will then share the purchase and auction fees and proceeds for that row. 3. Inflationary : when an increasing amount of tokens is released with a certain rate and frequency until a certain date. Linear will then share the purchase and auction fees and proceeds for that row. 4. Deflationary : when a decreasing amount of tokens is released with a certain rate and frequency until a certain date. Linear will then share the purchase and auction fees and proceeds for that row.	Insert a number (Must be ≥ 1)	daily, weekly, monthly, quarterly, yearly (If the vesting frequency is more than quarterly, select "yearly" and if of above intervals)	Inflation or deflation rate % / 100. Only applicable to inflationary/deflationary vesting type. Otherwise, keep it blank. This means the vesting tokens for the t+1 period will be calculated as 1 * (1 ± rate)	Amount of tokens released during the WHOLE Vesting Insert a number

- 1- Select **File** > **Make a Copy** to prepare your submission using Google Sheets.
- 2- Please adhere to the format. Do NOT renumber/reumber the rows, or modify the template in any way. You may insert additional rows (one row per entry) as long as the format is not altered.
Do not delete, edit or mistaking claims may render your submission unusable!
- 3- The orange cells contain completed samples for reference, with the **preview chart** located in the top right corner.
- 4- Review the **review instructions in Rows 4-6** before inputting data into the **purple cells**.
- 5- Go to **Data**, **Get Data** tab (everything in **autocomplete**) > Delete all empty/unfilled rows (**do not add anything else!**) > Download the file in **CSV** format > Upload the CSV file via the SRD
- 7- If you do not want, input manually in **SHEET**.
- 8- If successfully processed, the UNLOCK schedule will appear **blue** and on the corresponding **CSG** schedule. Unlocked Supply (UCS) is NOT the same as circulating supply (CS).
If you are unable to upload, please check if you have added data for the following reasons: (i) Add false information or (ii) Deduct burnt tokens
- 9- Untracked Tokens = (MS - MTS) / TS, locked + unlocked at the terminal point on the Unlock Schedule chart.

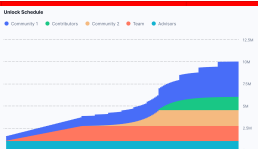

[SAMPLE] S/N	Allocation name	startDate	endDate	vestingType	vestingEvery	vestingFrequency	rate	tokenAmount
--------------	-----------------	-----------	---------	-------------	--------------	------------------	------	-------------

	Error state that each allocation name is unique	Insert allocation name For more details see the document explaining how to assign the allocation names according to reporting a number of the Risk-Id , Annex 3, Item 7. Note: Must be in YYYY-MM-DD hh:mm:ss as format	Start date of allocation, Must be in YYYY-MM-DD hh:mm:ss as format	End date of allocation, Note: Tokens will not be unlocked at noon. Check if there is an overpayment period for the same allocation	1 - CIPF: single event where tokens are released; it's the time as TSC except that it happens after some tokens are released already. If "CIPF" is entered as the ending type, insert that the "Inflationary" mechanism and "Investment-oriented" Status for that case must be checked. If all tokens are unlocked on TSC, select "CIPF" as the vestingType 2 - Invest: when the same amount of tokens is released for a certain frequency until a certain date. Insert that there the duration and enddate token are prepared for that row. 3 - Inflationary : when an increasing amount of tokens is released with a certain rate and frequency until a certain date. Insert that there the duration and enddate token are prepared for that row. 4 - Deflationary : when a decreasing amount of tokens is released with a certain rate and frequency until a certain date. Insert that there the duration and enddate token are prepared for that row.	(Insert a number must be >= 2)	Daily, weekly, monthly, quarterly, yearly (If the issuing frequency is money investment oriented or non-invested one of those above intervals)	Inflation or deflation rate % / 100. Only applicable to inflationary/investment-type. Otherwise, keep 8 blank) This means the vesting value for the t+1 period will be calculated as $t * (t + \text{rate})$.	Amount of tokens released during the VINCULI lifetime Insert a number

Instruction

- 1- Select **File > Make a Copy** to prepare your submission using Google Sheets.
2- Please adhere to the format. Do NOT reordernumbermerge the rows, or modify the template in any way. You may insert additional rows (one row per entry) as long as the format is not altered.
3- Be truthful. False or misleading claims may render your submission inadmissible.
4- The orange cells contain **completed samples** for reference, with the **preview chart** located in the top right corner.
5- Login to [airtable.com](#) (password: 5872) and use the Bulk Upload function.
6- Review the **orange samples in Rows 5-13** before inputting data into the **yellow cells**.
7- If it does not work, input manually in [Google Sheets](#).
8- If successfully processed, the unlock schedule will appear [here](#) and on the corresponding [token page](#). **Unlocked Supply (UCS)** is **not the same** as circulating supply (CS).
9- Turn on how to receive **Untracked %**: (i) Add data for **untracked allocations** (if accounts for future releases or (ii) Deduct burnt tokens.
10- **Untracked tokens** = **Max (MS, TS)** - **locked** + **unlocked** at the terminal point on the Unlock Schedule chart.

Annex M - Token Unlock Schedule (POPULATE THE YELLOW CELLS ONLY)

[SAMPLE] S/N	Allocation name	startDate	endDate	vestingType	vestingEvery	vestingFrequency	rate	tokenAmount
	Ensure that each allocation name is unique. For rows with auto-closing date , ensure that the allocation name is updated by appending a number at the back, i.e. Team 1, Team 2	Start date of allocation. Must be in YYYY-MM-DD hh:mm:ss format	End date of allocation. Must be in YYYY-MM-DD hh:mm:ss format Note: Tokens will not be unlocked at end date . Check if there is an over-locked period for the same allocation.	1. Cliff: single event where tokens are released. It's the same as TGE except that it happens after some tokens are released already. If "Cliff" is entered in the vesting date, ensure that the vestingEvery and vestingFrequency fields for that row are blank. If all tokens are unlocked on TGE, select "Cliff" at the vesting type. 2. Linear: when the same amount of tokens is released with a certain frequency until a certain date. Ensure that there the startdate and enddate fields are populated for that row. 3. Inflationary: when an increasing amount of tokens is released with a certain rate and frequency until a certain date. Ensure that there the startdate and enddate fields are populated for that row. 4. Inflationary: when a decreasing amount of tokens is released with a certain rate and frequency until a certain date. Ensure that there the startdate and enddate fields are populated for that row.	Insert a number (Must be > 0)	daily, weekly, monthly, quarterly, yearly (If the vesting frequency is daily , weekly , monthly , quarterly , or yearly , estimate the rate using one of the above intervals)	Inflation or deflation rate % / 100. (Must be > 0 and < 1) Only applicable to inflationary/deflationary vesting type Otherwise, keep it blank. Example: 10% = 0.1, 1% = 0.01 This means the vesting tokens for the 1st period will be calculated as 1 * (1 > rate)	Amount of tokens released during the WHOLE interval. Insert a number
173	Insert allocation name	YYYY-MM-DD hh:mm:ss	YYYY-MM-DD hh:mm:ss	Insert vesting type	insert number ≥ 1	Insert frequency	Inflation or deflation rate (Must > 0 and < 1)	Insert numerical value

[illegible]

This is a sample of how a completed Annex A should look like

Instruction

1. Select 'File' > 'Share' > 'Copy' to prepare your submission using Google Sheets. For a completed sample, please see [this sample](#).
2. Insert as many rows as required for ITEMS A & B ONLY (1 row per address). Highlight the reserve wallet addresses in red: [Circulating Supply](#) < [Total Supply](#) < [Reserves from reserve wallets](#).
3. Input data into the yellow cells.
4. Please adhere to the format and use the predefined values from the drop-down menus.
5. Please submit your responses with the proper formatting by sharing the Google Sheets URL and granting public access to the sheet. File > Share > Anyone on the Internet with this link can view.
6. Be truthful. False or misleading claims may render your submission inadmissible. Supply verification is subject to our [audit protocol](#).

Annex A - Rich List & Reserve Addresses

If the asset is on multiple chains, please aggregate the addresses across all chains and color code them

This is a sample of how a completed Annex B should look like

Instruction

- 1 - Select 'File > Make a Copy' to prepare your submission using Google Sheets. For a completed sample, please see [B-Sample](#).
- 2 - Insert as many rows as required for ITEM 16 ONLY (1 row per address). Highlight the reserve wallet addresses in red. Circulating Supply = Total Supply - Balances from reserve wallets
- 3 - Input data into the yellow cells.
- 4 - Please adhere to the format and use the predefined values from the drop down menus.
- 5 - Please submit your responses with the proper formatting by sharing the Google Sheets URL and granting public access to the sheet. File > Share > Anyone on the Internet with this link can view
- 6 - Be truthful. False or misleading claims may render your submission inadmissible. Supply verification is subject to our methodology.

Annex B - Swap form for TPT (Information is not real and for illustrative purposes only)

If the asset is on multiple chains, please aggregate the addresses across all chains and color code them

S/N	Swap Details	Swap Details	Exchange	Swap End Date	Proof
1	(Old) Circulating Supply = # of coins that are circulating in the market and in the general public's hands.	1,337	NA		https://www.TPTexplorer.net/text/getcirculatingsupply
2	(Old) Total Supply = # of coins in existence right now (minus any coins that have been verifiably burned.	133,700	NA		https://www.TPTexplorer.net/text/gettotalsupply
3	(Old) Max Supply = maximum # of coins that will ever exist in the lifetime of the cryptocurrency.	1,337,000,000	NA		https://www.TPTexplorer.net/text/getmaxsupply
4	(New) Circulating Supply = # of coins that are circulating in the market and in the general public's hands.	13,370	NA		https://www.TPTscan.net/text/getcirculatingsupply
5	(New) Total Supply = # of coins in existence right now (minus any coins that have been verifiably burned.	1,337,000	NA		https://www.TPTscan.net/text/gettotalsupply
6	(New) Max Supply = maximum # of coins that will ever exist in the lifetime of the cryptocurrency.	13,370,000,000	NA		https://www.TPTscan.net/text/getmaxsupply
7	Will the new asset replace the original one? Or will both continue to co-exist side by side?	Coexist on 2 chains	NA		The asset will coexist on dual chains. The total supply on ETH will be X. The total supply on EOS will be Y. The circulating supply on ETH will be X. The Circulating Supply on EOS will be Y. The details can be verified on our website - www.tpt.com
8	Swap/fork ratio. (e.g. 1:1 exchange)	10:1	NA		The details can be verified on our website - www.tpt.com and tweet from our Twitter account (https://twitter.com/TPT/Status/thisisjustanexample)
9	Platform that the old chain was on (e.g. Ethereum, NEO, EOS, Stellar)	Ethereum	NA		The details can be verified on our website - www.tpt.com and tweet from our Twitter account (https://twitter.com/TPT/Status/thisisjustanexample)
10	Platform that the new chain is on (e.g. Ethereum, NEO, EOS, Stellar)	Binance Smart Chain	NA		The details can be verified on our website - www.tpt.com and tweet from our Twitter account (https://twitter.com/TPT/Status/thisisjustanexample)
11	Date of conclusion of swap/fork (DD/MM/YYYY).	04 Apr 2020	NA		The details can be verified on our website - www.tpt.com and tweet from our Twitter account (https://twitter.com/TPT/Status/thisisjustanexample)
12	API endpoint for Total Supply - Numerical value only and denominated in the same units to calculate the price - Example: http://chains.cryptoid.info/grs/api/dws?c=totalcoins	https://sub.id/api/v1/chains/subsocial/supply/total	NA		NA
13	API endpoint for Circulating Supply - Numerical value only and denominated in the same units to calculate the price - Example: https://sub.id/api/v1/chains/subsocial/supply/circulating	https://sub.id/api/v1/chains/subsocial/supply/circulating	NA		NA
